Inphosoft is a private company limited by share which was incorporated on September 18, 2009 under the Singapore Companies Act (Cap. 50, Statues of the Republic of Singapore). Inphosoft's head office, which also services as its registered office is located at 750C Chai Chee Road, #04-02, Technopark@ChaiChee, Singapore 469003.

The principal activities of the Corporation are the provision of inter-operator short message services (SMS) in Hong Kong, and the design and development of custom software (and related license fees, support and maintenance) primarily related to mobile data applications. Software and related revenues are primarily derived from customers in Singapore, Malaysia and Indonesia. The consolidated financial statements of the Corporation as at and for the three and nine months ended December 31, 2013 and 2012 comprise the Corporation and its subsidiaries.

2. Basis of presentation

These unaudited interim condensed financial statements of the Corporation as at and for the three and nine months ended December 31, 2013 have been prepared in accordance with International Financial Reporting Standards (IFRS) as issued by the International Accounting Standards Board (IASB). Specifically they have been prepared in accordance with International Accounting Standard (IAS) 34 Interim Financial Reporting. The unaudited interim condensed consolidated financial statements do not include all of the information required for annual financial statements and should be read in conjunction with the audited consolidated financial statements for the year ended March 31, 2013 which have been prepared in accordance with IFRS.

The policies applied in these consolidated financial statements are based on IFRS issued and outstanding as of February 26, 2015, the date the Board of Directors approved the statements.

Amounts are reported in Canadian dollars unless otherwise indicated.

3. Summary of significant accounting policies

The significant accounting policies used in the preparation of these unaudited interim condensed consolidated financial statements are described in Note 3 of the audited consolidated financial statements for the year ended March 31, 2013. There have been no changes to our accounting policies since March 31, 2013, except for the following:

The Corporation has adopted the following new and revised standards, along with any consequential amendments, effective January 1, 2013. These changes were made in accordance with the applicable transitional provisions with no impact on the financial statements on adopting the following standards.

- IFRS 10 Consolidated Financial Statements replaces IAS 27 Consolidated and Separate Financial Statements and SIC 12 Consolidation – Special Purpose Entities. IFRS 10 revises the definition of control and focuses on the need to have power and variable returns for control to be present.
- IFRS 11 Joint Arrangements requires a company to classify its interest in a joint arrangement as
 a joint venture or joint operation. Joint ventures will be accounted for using the equity method of
 accounting whereas for a joint operation the company will recognize its share of the assets,
 liabilities, revenue and expenses of the joint operation. IFRS 11 supersedes IAS 31 Interests in
 Joint Ventures, and SIC-13 Jointly Controlled Entities—Non-monetary Contributions by
 Venturers.
- IFRS 12 Disclosure of Interest in Other Entities replaces the disclosure requirements previously included in IAS 27, IAS 31, and IAS 28 Investments in Associates. It sets out the extensive disclosure requirements relating to an entity's interests in subsidiaries, joint arrangements, associates and unconsolidated structured entities.
- IFRS 13 Fair Value Measurement is a comprehensive standard for fair value measurement and disclosure requirements for use across all IFRS standards. The new standard clarifies that fair value is the price that would be received to sell an asset, or paid to transfer a liability in an orderly transaction between market participants, at the measurement date. It also establishes disclosures about fair value measurement. Under existing IFRS, guidance on measuring and disclosing fair value is dispersed among the specific standards requiring fair value measurements and in many cases does not reflect a clear measurement basis or consistent disclosures. The Company adopted IFRS 13 on January 1, 2013 on a prospective basis. The adoption of IFRS 13 did not require any adjustments to the valuation techniques used by the Company to measure fair value and did not result in any measurement adjustments as at January 1, 2013.

4. Business acquisition transaction

Share purchase agreement

On September 28, 2012, the Corporation completed a share purchase agreement with Inphosoft Pte. Ltd. ("Inphosoft"), a private corporation governed by the laws of Singapore, to acquire all of the issued and outstanding shares of Inphosoft's wholly owned subsidiary, Inphosoft Group Pte. Ltd., for a total consideration of \$11.3 million. The purchase consideration consists of the following:

- \$400,000 in cash due on closing, for which the cheque was issued subsequent to March 31, 2013.
- \$10,500,000 in convertible debentures, of which \$6,500,000 were issued to Inphosoft, and the remaining \$4,000,000 were issued to Inphosoft and delivered to the agent (note 8).
- \$400,000 in a non-interest bearing promissory note payable after the first year anniversary date of the closing date. The note has a present value as of September 28, 2012 of \$366,523 based on a discount rate of 6%.

Each non-interest bearing debenture has a term of three years and may not be converted if the result of conversion will result in the debenture holder holding more than 10% of the issued and outstanding shares, or with any person or group acting jointly or in concert will hold more than 20% of the issued and outstanding common shares of the Corporation.

The convertible debentures are redeemable at \$0.10 per common share by the Corporation at any time prior to their maturity. The payment shall not be made by GINSMS prior to 10 business Days from the delivery of a redemption notice to Inphosoft; during which period Inphosoft can convert all or any part of the principal amount of convertible debentures into common shares.

In addition, debentures in the principal amount of \$4,000,000 were deposited at closing in escrow and will be released upon the achievement of certain established profit levels over the next two years.

The first \$2 million will be released if profit of \$600,000 is obtained per the December 31, 2011 audited financial statements of Inphosoft, which was successfully obtained. The remaining \$2 million will be released if profit of \$1,250,000 is achieved per the March 31, 2013 audited financial statements and for the fifteen-month period then ended prepared in accordance with IFRS, otherwise, for every \$1 of profit, \$1.6 of escrowed debentures will be released.

All costs of the transaction, including legal, accounting, professional advisory fees, transfer agent, and other were expensed during the year ended March 31, 2013; including the issuance of 200,000 common shares at a fair value of \$10,000.

The proceeds described above had a total present value of \$5,753,530 at the date of issuance, as outlined below, based on the convertible debentures having a three year repayment schedule and an implicit rate of 26.01%, determined based on an independent valuation report incorporating a discount rate for similar obligations and the contingent nature of a portion of the debentures. This present value represents the acquisition price at September 28, 2012 by the Corporation of all the issued and outstanding shares of Inphosoft. The following table summarizes the fair values of the assets acquired and liabilities assumed at the date of acquisition. This table represents the preliminary accounting for the acquisition and may be adjusted in the period not to exceed one year from the date of acquisition:

Business combinations are accounted for under the acquisition method. The consideration transferred for the acquisition of a subsidiary is the fair value of the assets transferred, the liabilities incurred and the equity interests issued by the Corporation at the date control is obtained.

The consideration transferred includes the fair value of any asset or liability resulting from a contingent consideration arrangement. Acquisition-related costs, other than share and debt issue costs, are expensed as incurred. Identifiable assets acquired and liabilities assumed in a business combination are measured initially at their fair value at the acquisition date.

The excess of the consideration transferred over the fair value of the Corporation's share of the identifiable net assets acquired is recorded as goodwill.

On August 8, 2013, the Corporation announced that the profit for the fifteen-month period then ended was \$380,792 leading to a release of \$609,267 in convertible debentures from escrow. This adjustment to the contingent consideration, as a result of an event that occurred subsequent to the acquisition date, resulted in a fair value decrease to the debentures of \$108,881 (note 8). This has been recorded in operating income for the nine months ended December 31, 2013 with no adjustment to the purchase price equation on acquisition.

On April 5, 2013, the Corporation closed a private placement by issuing 8,000,000 common shares at a price of \$0.05 per share for total gross proceeds of \$400,000.

For the three and nine months ended December 31, 2013 and 2012, all outstanding options to purchase common shares that were outstanding during the respective periods were not included in the calculations of the weighted average number of shares outstanding as they were anti-dilutive.

10. Reserves

The Corporation has adopted a stock-option plan which provides that the Board of Directors of the Corporation may from time to time, in its discretion and in accordance with the Exchange requirements, grant to directors, officers, employees and consultants of the Corporation and its subsidiaries, non-transferable options to purchase common shares, provided that the number of common shares reserved for issuance will not exceed 10% of the total issued and outstanding common shares of the Corporation, for a period of up to ten years from the date of the grant. It is at the discretion of the Board of Directors of the Corporation to determine the time during which options shall vest and the method of vesting, or that no vesting restriction shall exist.

Options granted to Consultants performing investor relations activities will contain vesting provisions such that vesting occurs over at least twelve months with no more than ¼ of the options vesting in any three month period. The number of common shares reserved for issuance to any individual director or officer of the Corporation will not exceed 5% of the issued and outstanding common shares and the number of common shares reserved for issuance to all technical consultants, if any, will not exceed 2% of the issued and outstanding common shares.

If an optionee ceases to be a director, officer, or technical consultant of the Corporation for any reason other than death, the optionee may exercise options at the date of the cessation of the optionee's position or arrangement with the Corporation, provided that if the cessation of such position or arrangement was by reason of death, the option may be exercised within a maximum period of one year after such death, subject to the expiry date of such option.

13. Financial risk management

The Corporation is exposed to financial risks due to the nature of its business and the financial assets and liabilities it holds. The following discussion reviews material financial risks, quantifies the associated exposures, and explains how these risks, and the Corporation's capital, are managed.

a) Market risk

Cash flow and fair value interest rate risk.

As the Corporation has no significant interest-bearing assets, its earnings and operating cash flows are substantially independent of change in market interest rates.

The Corporation's interest rate risk would arise from borrowings, issued at variable rates and expose the Corporation to cash flow interest rate risk. Borrowings issued at a fixed rate expose the Corporation to fair value interest rate risk. The Corporation is not exposed to such risk.

b) Credit risk

Credit risk arises from cash and cash equivalents and deposits with banks and financial institutions. The Corporation reduces this risk by dealing with creditworthy financial institutions.

Credit risk also results from the possibility that a loss may occur from the failure of another party to adhere to payment terms. To lower this risk, the Corporation's extension of credit is based on an evaluation of each customer's financial condition. Management reviews the ageing of trade accounts receivable and other factors relating to the risk that customer accounts may not be paid in full and, when appropriate, reduces the carrying value to provide for possible loss. No loss has been charged to income in the current year.

The following table summarizes the accounts receivable overdue:

			Total		Due in 30 days		Over 90 days overdue
December 31, 2013 March 31, 2013	\$	561,382 1,070,793	\$	514,683 834,053	\$	22,826 116,960	\$ 23,873 119,780

Of significant individual accounts receivable as at December 31, 2013 approximately 90% was owed from four customers (March 31, 2013 – 89% was owed from four customers).

The carrying amount of cash and accounts receivable represents the Corporation's maximum credit exposure.

c) Liquidity risk

The Corporation manages its risk of not meeting its financial obligations through management of its capital structure, and annual budgeting of its revenues, expenditures and cash flows.

Accounts payable and accrued liabilities arise in the normal course of business, and all amounts are due within three months or less of the statement of financial position date except for \$42,293 as of December 31, 2013 (March 31, 2013 - \$78,240) which are due between three and twelve months of the statement of financial position date.

Notes to the Condensed Interim Consolidated Financial Statements

Three and nine month period ended December 31, 2013 (Unaudited)

13. Financial risk management (continued)

The Corporation believes it has adequate working capital and cash flows to discharge its financial obligations.

d) Fair values

At December 31, 2013 and March 31, 2013 the fair values of cash, accounts receivable, accounts payable and accrued liabilities approximate their carrying values given the expected short-term to maturity of these instruments.

The Corporation has classified the financial instruments measured at fair value in accordance with a three level hierarchy. The hierarchy groups financial assets and liabilities into three levels based on the significance of inputs used in measuring the fair values of the financial assets and liabilities. The fair value hierarchy has the following levels:

- (i) Level 1: quoted prices (unadjusted) in active markets for identical assets or liabilities;
- (ii) Level 2: inputs other than quoted prices included within Level 1 that are observable for the asset or liability either directly (i.e. as prices) or indirectly (i.e. derived from prices); and
- (iii) Level 3: inputs for the asset or liability that are not based on observable market data (unobservable inputs).

The level within which the financial asset or liability is classified is determined based on the lowest level of significant input to the fair value measurement. At December 31, 2013 and March 31, 2013, the Corporation's cash has been assessed at level 1 based on the fair value hierarchy above.

Assessment of the significance of a particular input to the fair value measurement requires judgment and may affect the placement within the fair value hierarchy.

13. Financial risk management (continued)

e) Capital management

Capital is comprised of shareholders equity (deficit) on the statement of financial position. The Corporation's objective when managing capital is to safeguard its ability to continue as a going concern, so that it can continue to provide returns to shareholders. The Corporation's sources of additional capital and policies for distribution of excess capital may also be affected by the Corporation's capital management objectives.

The Corporation manages capital by regularly monitoring its current and expected liquidity requirements rather than using debt/equity ratio analyses. The capital is generally used for defraying the administrative expenses in promoting the objectives of the Corporation. The Corporation is not subject to either internally or externally imposed capital requirements.

f) Currency risk

Foreign currency risk is defined as the Corporation's exposure to a gain or a loss in the value of its financial instruments as a result of fluctuations in foreign exchange rates. The Corporation is exposed to foreign currency rate variability primarily in relation to certain assets and liabilities denominated in foreign currencies.

As well, most of its foreign operations are self-sustaining and these foreign operations' functional currencies are in HKD and SD. The Corporation's related exposure to the foreign currency rates is primarily through cash and other working capital elements of these foreign operations.

The Corporation also mitigates foreign currency risks, within each segment, by transacting in their functional currency for material procurement, sales contracts and financing activities.

The following presents the financial instruments that are exposed to foreign exchange volatility:

	Canadian Dollars	Singapore Dollars	Hong Kong Dollars	Cdn Equivalent
Cash Accounts receivable and other Accounts payable and accrued	\$ 8,653 5,068	\$ 198,613 575,934	\$ 24,275 517,727	\$ 179,334 561,382
